Overview

In order to use your iOS 6 Mail app with your Windstream Hosted Email, please follow the steps in this guide.

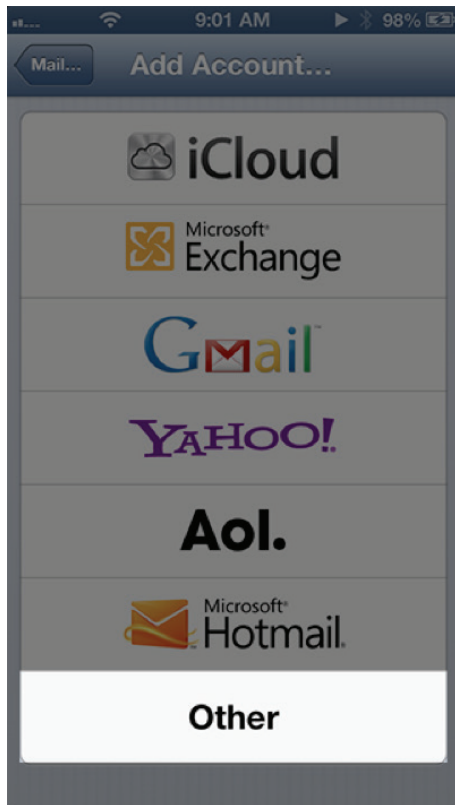

Step 1: Settings App

From the iPhone home screen, select **Settings** and then **Mail, Contacts, Calendars**. Select **Add Account...** under the **Accounts** section.

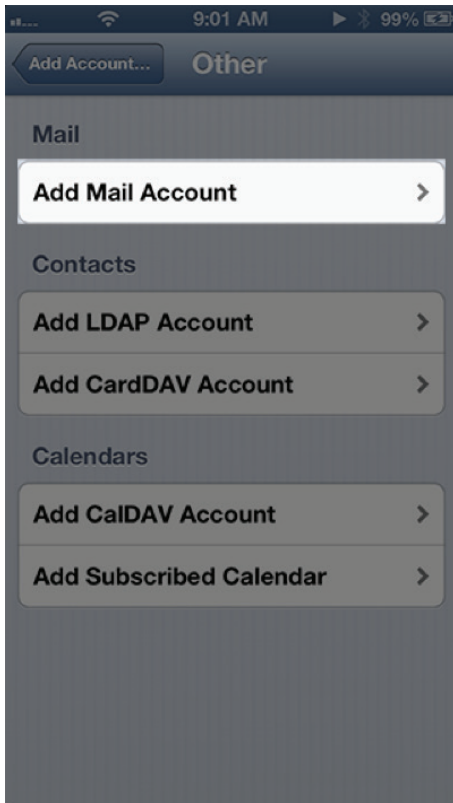

Step 2: Add Account

On the **Add Account...** screen, select the very bottom option, **Other**.

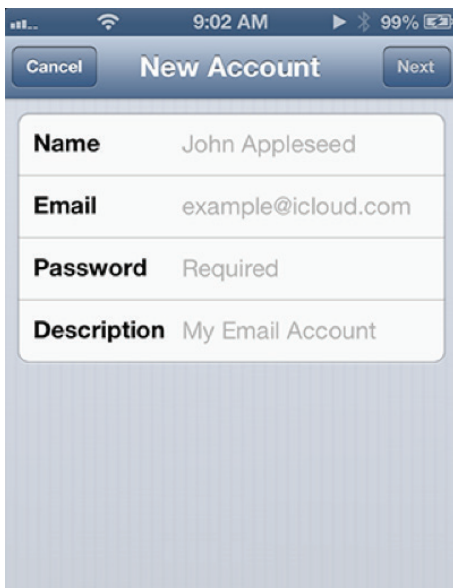

Step 3: Mail Account

Select **Add Mail Account** under **Mail**.

Step 4: Account Info

Fill in the **Name**, **Address**, **Password**, and **Description** fields and then select **Next** on the top right.

Step 5: Server Settings

Select either **IMAP** or **POP** at the top. This selection is user preference and the settings themselves will be the same regardless. After you choose your account type, fill-in the information below with the server names outlined in the table below and then select **Next** at the top right of your screen.

Server Settings	
Incoming Server (POP)	mail.windstreamhosting.com
Incoming Server (IMAP)	mail.windstreamhosting.com
Outgoing Server (SMTP)	mail.windstreamhosting.com
Incoming Server (SSL)	securemail.windstreamhosting.com
Outgoing Server (SSL)	securemail.windstreamhosting.com
Username	Your entire email address
Password	Your email address password

Default Port Settings	
Incoming Server	110
Outgoing Server	25

IMAP Port Settings	
Incoming Server	143
Outgoing Server	25

SSL Port Settings	
Incoming Server	995
Outgoing Server	465

Note: Outgoing port of 1025 can be used if your service provider blocks port 25.

The screenshot shows the 'IMAP' settings screen for an email account. At the top, there are two tabs: 'IMAP' (selected) and 'POP'. Below the tabs, there are three rows of information: 'Name' (Example Account), 'Email' (example.account@windst...), and 'Description' (example.account@windst...). Underneath, there is a section for the 'Incoming Mail Server' with three rows: 'Host Name' (mail.windstreamhosting.c...), 'User Name' (example.account@windst...), and 'Password' (represented by ten dots). Finally, there is a section for the 'Outgoing Mail Server' with three rows: 'Host Name' (mail.windstreamhosting.com), 'User Name' (example.account@windst...), and 'Password' (represented by ten dots).

Step 6: Primary Server

After the account has been verified, you will be taken back to the main Accounts screen. Select your email account from the list, which will take you back into the settings screen that you just filled-in. Scroll down to the bottom and click on the **SMTP** field under **Outgoing Mail Server**. Select the **Primary Mail Server**.

The screenshot shows the 'SMTP' settings screen. At the top, there is a status bar with 'AT&T', '11:57 AM', and a battery icon. Below the status bar, there is a navigation bar with a back arrow and the word 'Account', and the title 'SMTP'. Underneath, there is a section for the 'Primary Server' with a single row containing the text 'mail.windstreamhosting.com' and a right-pointing chevron arrow.

Step 7: SMTP Settings

On the settings screen, scroll down to the bottom and make sure the **Use SSL** is **OFF**, Authentication is set to **Password**, and the **Server Port** is set to either **25** or **1025** and click **Done** in the top right corner.

Step 8: Advanced Settings

Go back into the settings for your account, and click on the **Advanced** field at the very bottom. Make sure that under **Incoming Settings**, **Use SSL** is **OFF**, **Authentication** is set to **Password**, and **Server Port** is set to **110** for POP or **143** for IMAP. Select **Done** in the top right corner when finished.

Your account is now created and you can now try to send and receive email.

data. voice. network. cloud.
